SUMMARY

Business Performance and Process Improvement Analyst with hands-on experience analyzing KPI management workflows, identifying reporting bottlenecks, and transforming fragmented operational processes into structured digital governance systems. Experienced in KPI monitoring, PDCA follow-up, approval workflow, performance visibility, stakeholder alignment, and management-level reporting. Built internal enterprise platforms at Kalbe Nutritionals that supported KPI governance, process standardization, auditability, and decision-support needs across departments/divisions.

EXPERIENCE

Product Owner / Business Analyst

PT Sanghiang Perkasa, Kalbe Nutritionals — Contract · Nov 2024 — May 2026 · Jakarta, Indonesia

- Analyzed manual KPI reporting workflows across Excel and SharePoint, identifying consolidation bottlenecks, ownership ambiguity, delayed follow-up, and data accountability gaps.
- Designed and implemented structured KPI governance workflows covering monthly achievement input, validation, approval, under-target monitoring, PDCA/PICAPA follow-up, audit trail, and management review visibility.
- Supported centralized performance visibility for **71 KPIs** across multiple departments/divisions/entities, including FA, HR, QFS, Management System, SHE, Plant SHP, Plant External, KMI, and KAMI.
- Helped transform fragmented KPI reporting into an integrated performance management workflow used by Management System stakeholders and leadership for monthly evaluation.
- Collaborated directly with Management System stakeholders to align KPI processes, approval rules, and reporting behavior with real operational constraints.
- Contributed to Ms Digi's direction as a federated KPI governance platform, where departments/divisions maintain validated KPI data while Ms Digi acts as the central performance visibility layer.
- Supported stakeholder-facing materials and positioning for management / Board-level presentation.
- Reconstructed legacy calibration workflows in Ecalmas by mapping existing user steps, process dependencies, role-based access, and reporting needs, enabling UAT delivery within one month.

PROJECTS

Ms Digi — KPI Governance & Performance Management Platform

Performance visibility · KPI governance · PDCA · Automated aggregation · Management review

- Designed and built an integrated KPI governance platform consolidating monthly achievement input, validation, approval, automated aggregation, under-target monitoring, PDCA trend analysis, reminders, audit trail, and management dashboards into one application.
- Supported performance management for **71 KPIs** across Plant/Manufacturing functions and multiple departments/divisions/entities.
- Enabled leadership-level performance visibility by automatically aggregating approved KPI data into charts, summaries, under-target views, and PDCA trend monitoring.
- Established clear role separation between PIC/Supervisor input, Management System validation, system-level aggregation, and management-level review.
- Helped position Ms Digi toward a federated KPI model, where department/division KPI sources remain owned by each function while Ms Digi provides centralized visibility and governance.
- Contributed to expansion planning from Plant/Manufacturing site toward Innovation site, covering project, legal, raw material, and Top Line Growth-related KPIs.

Ecalmas — Calibration Management System

Legacy reconstruction · .NET 10 · Role-based Access · Embedded Analytics · UAT delivered in 1 month

- Led requirement mapping and process reconstruction of a legacy calibration system — preserved workflow fidelity while modernizing the system foundation, reaching UAT within one month.
- Replaced an existing Tableau implementation with an embedded analytics dashboard after identifying the usage covered only basic aggregations the application layer could already handle.

The Strategist's Ledger — Federated KPI PoC

- Personal initiative exploring federated KPI architecture for cross-department financial metrics (Saving Cost, OP Contribution, Top Line Growth, COGS Ratio) — initiated as a proof-of-concept following observations of reporting fragmentation across divisions at Kalbe.

SKILLS

Business Performance & Planning: KPI Management, Performance Monitoring, Corporate KPI Governance, Management Reporting, PDCA / PICAPA, Under-target Analysis, Business Performance Visibility

Business Process Improvement: Process mapping, Gap analysis, Workflow Design, Root Cause Analysis, Process Standardization, Operational Bottleneck Analysis, Approval Flow Design, UAT Facilitation, Stakeholder Requirement Gathering

Digital Transformation: Internal Business Systems, Dashboard & Reporting Logic, Audit Trail Design, RBAC / Access Governance, Data Accountability, System Design, Automation & Reminder Workflow

Technical: .NET, C#, SQL Server, JavaScript, React, Next.js, Redis, Docker, Jenkins

EDUCATION

Universitas Bina Sarana Informatika

Bachelor's Degree in Information Systems · GPA: 3.72 / 4.00 · 2021 – 2025 · Jakarta, Indonesia
